# Tips for Navigating Moodle

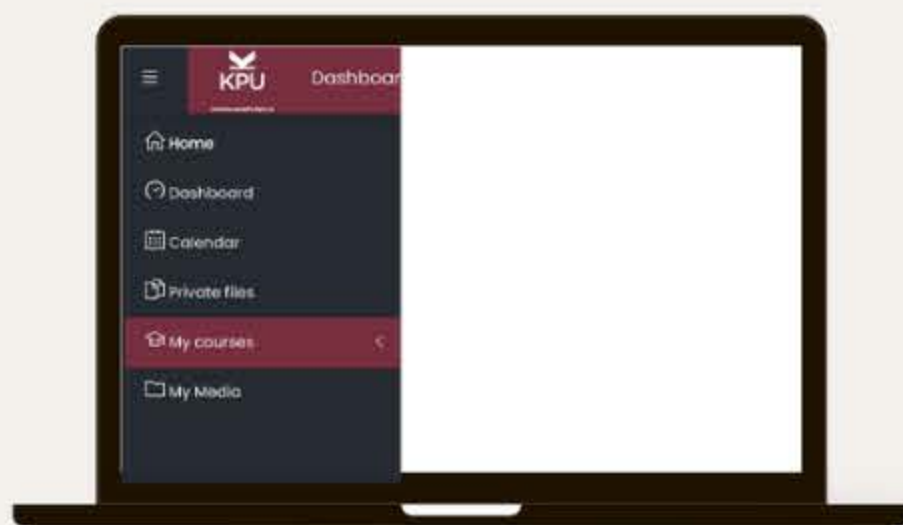

You can get to your courses from one.kpu.ca and pressing 'Course Websites' or go to https://courses.moodle.kpu.ca/

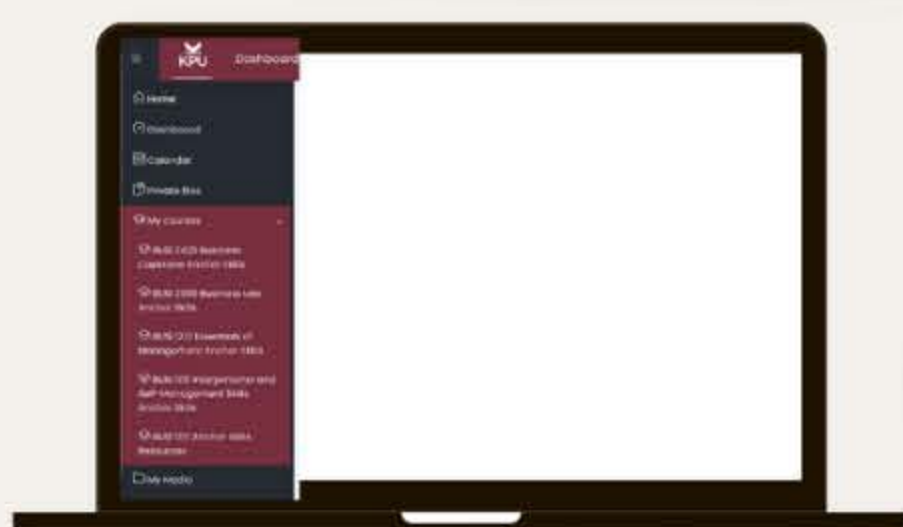

On the login page, put in your 9-digit student number and your password to login.

Inside a course page, you'll find things like announcements, discussion pages, handouts, assignments and other course material.

By clicking on"My courses" in the left navigation bar, you should be able to see all courses you are enrolled in

Please note: Not every instructor chooses to create a Moodle page for their course. If you can't find your course here, double check with your professor.

You can also check the top-right for notifications or for messages with other classmates and instructors. This could be helpful when working on group projects
