Academic Integrity
Supports for Faculty

Academic Integrity Unit - Office of the Provost

Supports with: student resources, events, and investigations/consultations for academic misconduct cases.

- Prevention of academic misconduct through the development of resources, such as the **Introduction to Academic Integrity Tutorial**
- Consultations and investigations once a potential breach has been identified
- Training for faculty on restorative justice approaches when dealing with academic integrity breaches, such as through our **Moodle course**
- Student and faculty engagement on the topic of academic integrity through events, such as Academic Integrity Week and through our Student Ambassadors

Contact Academic Integrity for:

- Questions about Policy **ST2, Student Academic Integrity**
- Suggestions on how to incorporate academic integrity into your course
- **Academic integrity presentation**s for your class
- Questions about how to identify academic misconduct
- Questions about what to do when you notice something that might be academic misconduct

Resources:

- **Academic Integrity Resource Shelf**
- **Academic Integrity Website**

Teaching & Learning Commons

Supports with: designing courses, lessons, assessments, grading rubrics to promote academic integrity

- **Learning opportunities**, attend regular workshops offered on assessment design, rubric development, setting up gradebook, Generative AI
- Offering customized workshops on request for departments that need support with assessment design at program or course level
- 1:1 consultation for faculty with lesson, assessment design to improve academic integrity

Resources and Guidance:

- **Assessment Design Tips to Promote Academic Integrity** – This resource will provide guidance with assessment design guidelines in general, assignment instruction development and grading rubric design guidelines to promote academic integrity
- **Generative AI** - Resources on guidelines for use of Gen AI, resources to support learning design and ways to promote academic integrity through Generative AI
- **Rubric Design for GenAI** - Provide feedback on assessment rubric design for mitigation, "leaning in," and embracing the use of GenAI for assignment completion. Depending on your need, the feedback can support mitigation strategies to privilege human-generated content, or feedback for collaborating with Generative AI.
