

Designing for accessibility

Designing for users with anxiety

Do...

give users enough time to complete an action

explain what will happen after completing a service

make important information clear

give users the support they need to complete a service

let users check their answers before they submit them

Don't...

rush users or set impractical time limits

leave users confused about next steps or timeframes

leave users uncertain about the consequences of their actions

make support or help hard to access

leave users questioning what answers they gave

Designing for users on the autistic spectrum

Do...

use simple colours

write in plain language

Do this.

use simple sentences and bullets

make buttons descriptive

Attach files

build simple and consistent layouts

Don't...

use bright contrasting colours

use figures of speech and idioms

create a wall of text

make buttons vague and unpredictable

Click here!

build complex and cluttered layouts

Designing for users who are D/deaf or hard of hearing

Do...

Don't...

write in plain language

Do this.

use complicated words or figures of speech

use subtitles or provide transcripts for videos

put content in audio or video only

use a linear, logical layout

make complex layouts and menus

break up content with sub-headings, images and videos

make users read long blocks of content

let users ask for their preferred communication support when booking appointments

make telephone the only means of contact for users

Designing for users with dyslexia

Do...

use images and diagrams to support text

align text to the left and keep a consistent layout

consider producing materials in other formats (for example audio or video)

keep content short, clear and simple

let users change the contrast between background and text

Don't...

use large blocks of heavy text

underline words, use italics or write in capitals

DON'T DO THIS

force users to remember things from previous pages - give reminders and prompts

rely on accurate spelling - use autocorrect or provide suggestions

put too much information in one place

Designing for users with low vision

Do...

use good colour contrasts and a readable font size

Don't...

use low colour contrasts and small font size

publish all information on web pages

bury information in downloads

use a combination of colour, shapes and text

only use colour to convey meaning

follow a linear, logical layout

200% magnification

spread content all over a page

200% magnification

put buttons and notifications in context

separate actions from their context

Designing for users with physical or motor disabilities

Do...

make large clickable actions

give form fields space

design for keyboard or speech only use

design with mobile and touchscreen in mind

provide shortcuts

Don't...

demand precision

bunch interactions together

make dynamic content that requires a lot of mouse movement

have short time out windows

tire users with lots of typing and scrolling

Designing for users of screen readers

Do...

Don't...

describe images and provide transcripts for video

`<alt>`

only show information in an image or video

follow a linear, logical layout

spread content all over a page

structure content using HTML5

`<h1>`
`<nav>`
`<label>`

rely on text size and placement for structure

36pt, bold
`<h1>`Header

build for keyboard-only use

force mouse or screen use

write descriptive links and headings **Contact us**

write uninformative links and headings **Click here**

Home Office Digital, Data and Technology's goal is to make exceptional services for everyone.

Understanding accessibility means we can build services that work for everyone, whatever their access need.

These posters show how you can make your service accessible for different access needs.

Email access@digital.homeoffice.gov.uk to get involved and help make Home Office services accessible by default.
